Tushar Tikia

Delhi, India | +91 88102 53861 | tushartikia@gmail.com | linkedin.com/in/tushar-tikia | github.com/tushart2004

Experience

Digital Udyami May 2025 – June 2025
Software Developer Intern *Delhi, India*

- Worked on the development and deployment of an **AI Interview Platform** as part of the software development team.
- Contributed to integrating AI-driven features for automated interview preparation and evaluation.
- Applied full-stack development skills to support platform implementation and deployment.

Education

University School of Information, Communication & Technology, GGSIPU Delhi, India
Master of Computer Application – Software Engineering *2025 – 2027*
Institute of Innovation in Technology and Management, GGSIPU Delhi, India
Bachelor of Computer Application *2022 – 2025*

Technical Projects

AI Interview Preparation Platform | *Multi-Agent AI Architecture* | GitHub | ai-interview-platform-bci4.vercel.app

- Built a full-stack AI interview platform with **15 modules**, **40+ REST APIs**, and MERN architecture.
- Designed an AI Orchestrator coordinating **6 specialized agents** for question generation, evaluation, emotion/speech analysis, adaptive difficulty, and feedback.
- Implemented JWT authentication, RBAC, and Express middleware supporting user, admin, recruiter, and mentor roles.
- Integrated speech recognition, webcam emotion tracking, adaptive difficulty, and coding assessments.
- Developed performance analytics using Redux Toolkit + Chart.js with MongoDB data across **7 collections**.

AI Software Architect | *AI-Powered System Design Platform* | GitHub | client-lilac-zeta-95.vercel.app/

- Built an AI-powered platform converting natural-language ideas into **requirements, architecture, database schemas, and API designs**.
- Developed an interactive architecture designer for components, connections, and visual system diagrams.
- Implemented AI-powered architecture reviews covering **scalability, security, reliability, maintainability, and cost**.
- Added architecture alternatives, comparison, documentation, and export workflows for **Monolithic, Modular Monolith, and Microservices**.

Technical Skills

Languages: JavaScript (ES6+), C++
Frontend: React.js, Redux Toolkit, Tailwind CSS, Responsive UI Design
Backend: Node.js, Express.js, REST APIs, Middleware Architecture
Databases: MongoDB, Mongoose, NoSQL Schema Design, SQL (basic)
AI & Systems: Multiple API Integration, Multi-Agent Architecture, Adaptive Algorithms
Core Concepts: Data Structures & Algorithms, OOPs, Authentication
Testing & Tools: Postman, Git, GitHub, VS Code, Axios, Docker

Certifications

AWS Solutions Architecture Job Simulation – Amazon Web Services | Cloud architecture, scalability & reliability
Samsung Innovation Campus – AI Learning | Artificial Intelligence & Machine Learning
Full Stack Web Development – DevTown | MERN stack, REST APIs & responsive development
Generative AI Study Jams & Prompt Design – Google Cloud | Prompt engineering & generative AI
Data Structures in C++ – Coding Ninjas | DSA, recursion, trees, graphs & dynamic programming
