

TUSHAR TIKIA

Delhi, India | +91 88102 53861 | tushartikia@gmail.com | linkedin.com/in/tushar-tikia- | github.com/tushart2004

PROFESSIONAL SUMMARY

Aspiring Software Development Engineer with experience in full-stack web development and AI-powered applications. Built production-style MERN applications featuring multi-agent AI workflows, secure authentication, and scalable backend architectures. Strong problem-solving skills with a solid foundation in Data Structures & Algorithms and software engineering.

EDUCATION

University School of Information, Communication & Technology, GGSIPU <i>Master of Computer Application – Software Engineering</i>	Delhi, India 2025 – 2027
Institute of Innovation in Technology and Management, GGSIPU <i>Bachelor of Computer Application</i>	Delhi, India 2022 – 2025

TECHNICAL PROJECTS

AI Interview Preparation Platform | *Multi-Agent AI Architecture* | [GitHub](#)

- Architected a production-grade full-stack AI interview platform with **15 modules** and **40+ REST APIs** using the MERN stack.
- Designed a centralized AI Orchestrator coordinating **6 specialized AI agents** for question generation, evaluation, emotion analysis, speech analysis, adaptive difficulty, and feedback.
- Implemented JWT-based authentication, RBAC, and Express middleware supporting user, admin, recruiter, and mentor roles.
- Integrated real-time speech recognition, webcam emotion tracking, and adaptive interview difficulty based on candidate performance.
- Developed coding assessment, analytics dashboard (Redux Toolkit + Chart.js), and optimized MongoDB schema with 7 collections.

Grocers Guru – Online Grocery E-Commerce | *MERN Stack* | [GitHub](#)

- Built a MERN-based e-commerce platform with JWT authentication, shopping cart, payment workflow, and order management.
- Designed 20+ RESTful APIs with validation, error handling, and modular backend architecture.
- Developed an admin dashboard with role-based authorization and real-time inventory management.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), C++, TypeScript (*learning*), Bash/Linux scripting (basic)

Frontend: React.js, Redux Toolkit, Tailwind CSS, Chart.js, Responsive UI Design

Backend: Node.js, Express.js, REST APIs, Middleware Architecture

Databases: MongoDB, Mongoose, NoSQL Schema Design, SQL (basic)

AI & Systems: OpenAI API Integration, Multi-Agent Architecture, Adaptive Algorithms

Core Concepts: Data Structures & Algorithms, OOP, System Design (basic), Authentication, RBAC, Agile/Scrum

Testing: Postman, Jest (*learning*), Git, GitHub

Tools: VS Code, Axios, Postman

CERTIFICATIONS

AWS Solutions Architecture Job Simulation – Amazon Web Services

Hands-on cloud architecture, scalability, reliability, and microservices deployment.

Full Stack Web Development – DevTown

Built MERN stack applications focusing on backend APIs and responsive frontend development.

Generative AI Study Jams & Prompt Design – Google Cloud

Explored prompt engineering, generative AI workflows, and AI application development.

Data Structures – Coding Ninjas

Covered recursion, trees, graphs, dynamic programming, and complexity optimization.
