Delhi, India

Professional Summary

Software Engineer with hands-on experience building full-stack and AI-integrated applications using C++, JavaScript, Node.js, React, and MongoDB. Experienced in software development, REST APIs, backend engineering, authentication, database design, testing, debugging, and system architecture. Strong foundation in Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, and software engineering.

Experience

Digital Udyami May 2025 – July 2025
Software Developer Intern *Delhi, India*

- Contributed to an AI Interview Platform across frontend and backend components using full-stack software development practices.
- Developed and integrated features for automated question generation, interview evaluation, feedback workflows, and user interactions.
- Supported application testing, debugging, feature integration, API development, and deployment.

Education

University School of Information, Communication & Technology, GGSIPU Delhi, India
Master of Computer Applications – Software Engineering *2025 – 2027*
Institute of Innovation in Technology and Management, GGSIPU Delhi, India
Bachelor of Computer Applications *2022 – 2025*

Projects

AI Interview Preparation Platform | *MERN, Multi-Agent AI Architecture* GitHub | Live

- Built a full-stack AI interview platform with 15 modules, 40+ backend files, 25+ REST API endpoints, and 7 MongoDB collections.
- Implemented 6 specialized AI agents with an AI orchestrator for question generation, answer evaluation, feedback, and adaptive difficulty.
- Developed JWT authentication, RBAC, Express middleware, speech recognition, webcam emotion tracking, coding assessments, and analytics.
- Built React 18 interfaces using Redux Toolkit, React Router, Tailwind CSS, Chart.js, Axios, Web Speech API, and getUserMedia.

AI Software Architect | *AI-Powered System Design Platform* GitHub | Live

- Built an AI-powered platform converting natural language ideas into software requirements, system architecture, database schemas, and API designs.
- Developed an interactive architecture designer with components, connections, system diagrams, and architecture workflows.
- Implemented AI architecture reviews covering scalability, security, reliability, maintainability, and cost, with alternatives for Monolithic and Microservices designs.

Technical Skills

Languages: JavaScript (ES6+), C++
Backend: Node.js, Express.js, REST APIs, Middleware Architecture
Frontend: React.js, Redux Toolkit, Tailwind CSS, Responsive UI Design
Databases: MongoDB, Mongoose, NoSQL Schema Design, SQL
Software Engineering: System Design, Software Architecture, Distributed Systems Concepts, Scalability, Authentication, RBAC
Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks
Tools: Git, GitHub, Postman, VS Code, Axios, Docker

Certifications

AWS Solutions Architecture Job Simulation – Cloud architecture and scalability

Samsung Innovation Campus – Artificial intelligence and machine learning

Full Stack Web Development – MERN stack and REST APIs

Generative AI Study Jams & Prompt Design – Prompt engineering and generative AI

Data Structures in C++ – DSA, recursion, trees, graphs
